Education and competencies for nurse educators in Europe

General objective
FINE, in association with the department of nursing science at the University of Turku have organized this workshop which concentrates on exploring the education and the competencies which must be achieved by nurse educators, in order to teach nursing in Europe.

The principle objectives of this workshop are to compare and exchange current practices and competences of nurse educators in order to harmonize and review education programmes for nurse educators. It is anticipated this will: Encourage nurse educator mobility across the European Union and more widely in order to build participation and sharing of experience as well as developing participation in the development of research.

FINE Workshop
09 October 2015
